## Cell Phone Charger Holder

Thank you for downloading this project. I hope you will enjoy making a hammock (or two).

**Before Printing the pattern pieces:** Please make sure your printer settings are set to "Print Actual Size". You can use the Control Box to see if the pattern pieces was printed in the actual size.

### Materials needed:

- ▶ Cotton fabric
- ▶ Ribbon, broderie anglaise etc., any decoration you like
- ▶ Fusible interfacing (heavy for the pocket and medium weight for the handle)
- ▶ Batting
- ▶ Or fusible batting instead of batting plus heavy weight interfacing for the pocket and back panel piece

### Cut:

- ▶ 2x pocket back panel pieces (1x main fabric, 1x lining fabric)
- ▶ 1x pocket back panel piece from interfacing and 1x from batting
- ▶ 2x front pocket pieces (1x main fabric, 1x lining fabric)
- ▶ 1x front pocket piece from interfacing and 1x from batting
- ▶ 1x handle piece from main fabric and 1x from medium weight interfacing

If you use heavy weight fabrics you won't need to use interfacing. I used quilting cotton and used interfacing to stabilize the fabrics.

**The video Instructions** for this pattern can be found here: <https://youtu.be/JfiraZ9wZLA>

Let's get started!

## Instructions

### Cut:

- ▶ 2x pocket back panel pieces (1x main fabric, 1x lining fabric)
- ▶ 1x pocket back panel piece from interfacing and 1x from batting
- ▶ 2x front pocket pieces (1x main fabric, 1x lining fabric)
- ▶ 1x front pocket piece from interfacing and 1x from batting
- ▶ 1x handle piece from main fabric and 1x from medium weight interfacing

If you would like to decorate the front pocket of the phone charger holder pocket, now is the time. I used Farbenmix Ribbon ([www.farbenmix.de](http://www.farbenmix.de)) and broderie anglaise.

Next I ironed the heavy interfacing to the back of one front pocket and one back panel piece.

Then I basted the batting pieces onto the interfacing I just attached.

Now I ironed the medium interfacing to the back of the handle piece.

I then folded the handle piece in half and pressed it.

I opened it up again and folded the outer edges onto the middle fold...

... and folded it again. I used 2 sewing clips to 'pin' the handle in place.

Next I sewed along the long edges with a wider stitch (3.0).

I then put the other front pocket piece right sides together onto the decorated front pocket piece and sewed them together along the top edge. Turn inside out and press.

Now I pinned the pocket to the back panel piece with the interfacing and batting attached to the left side. Then I basted the pocket to the back panel piece.

Next I folded the handle, pinned it to the top edge of the back panel piece and basted it into place.

Now it was time to put the other back panel piece, right sides together, on top and sew all the way around, except for one turning hole at the bottom edge (about 1.5" to 2" wide).

Then I turned the fabric inside out.

And I closed the turning hole by hand.

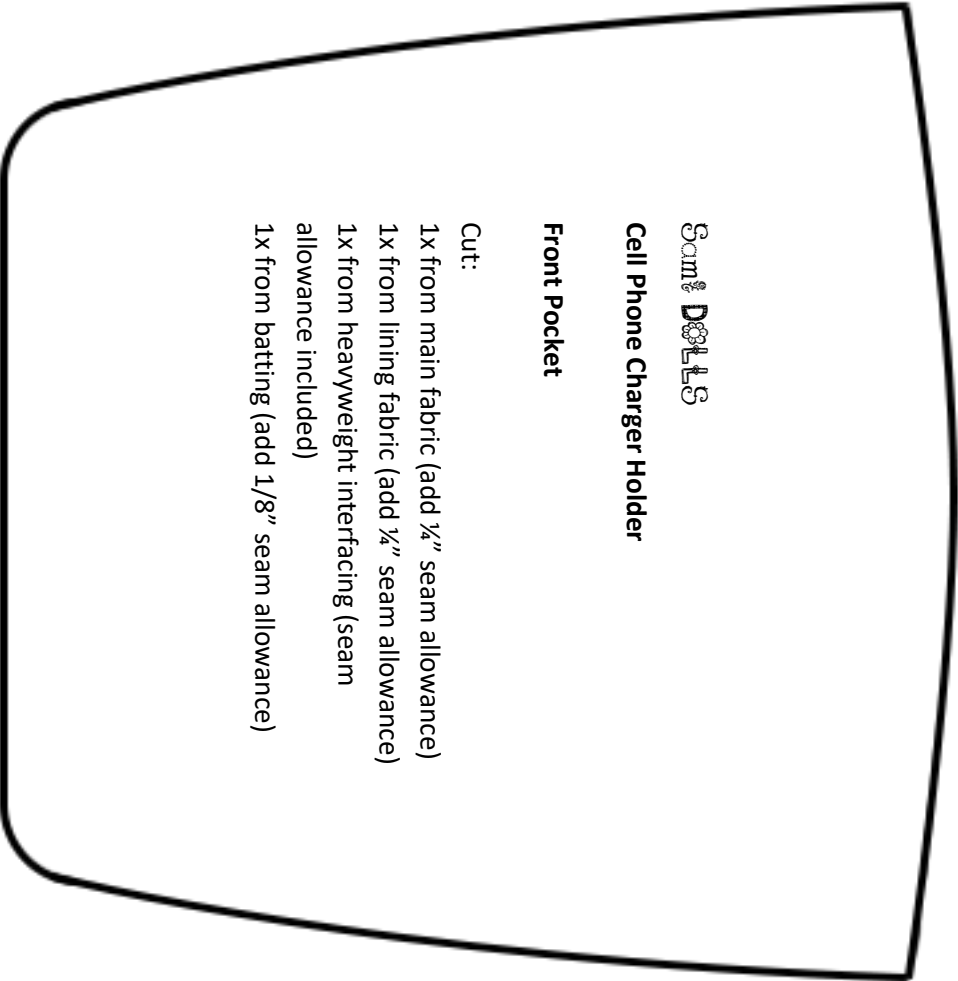

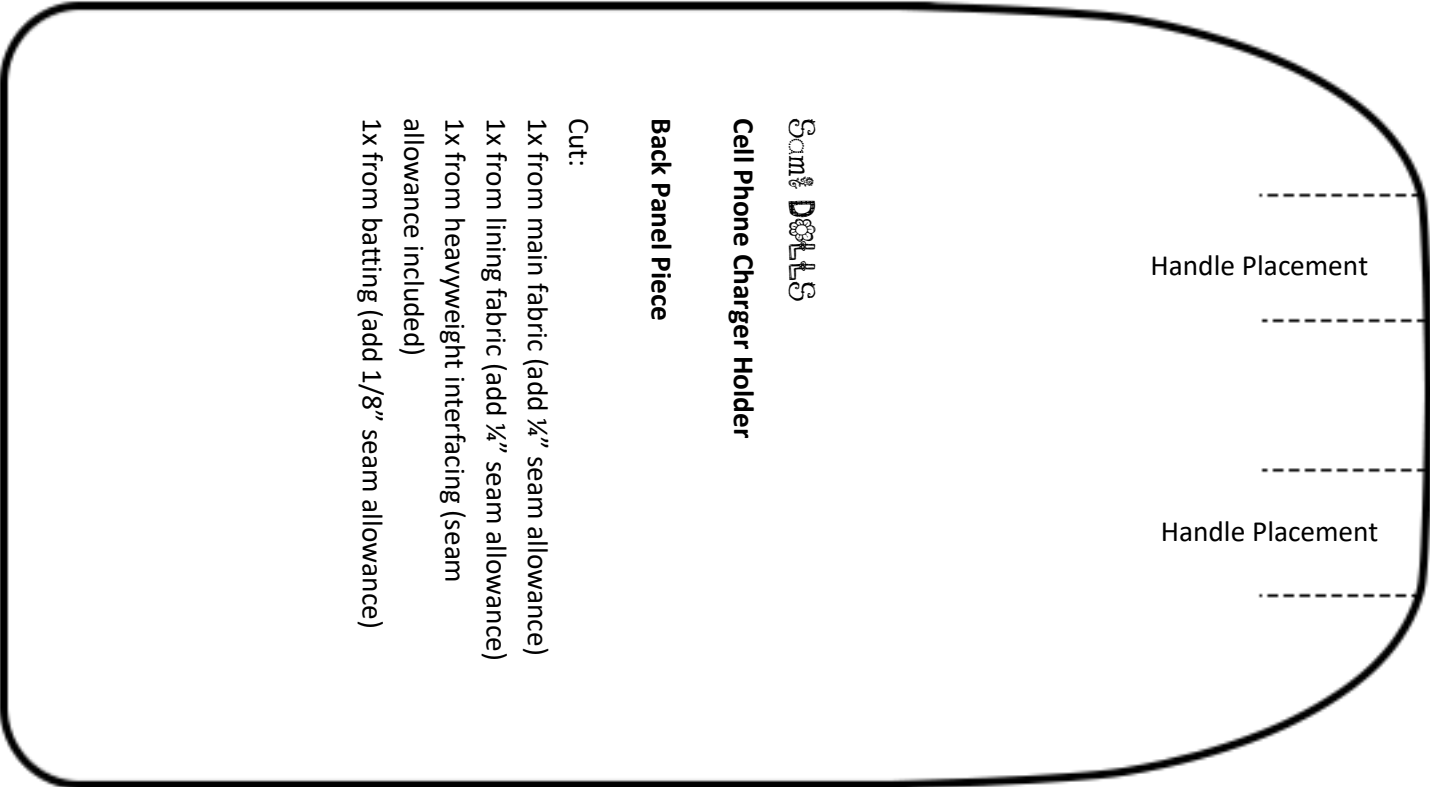

I hope you enjoyed this project.
